AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original): An interlayer film for a laminated glass,

which contains a polyvinyl acetal resin and a moisture resistance improver.

2. (original): The interlayer film for a laminated glass according to Claim 1,

wherein the moisture resistance improver is an amphiphile and/or a surfactant.

3. (currently amended): The interlayer film for a laminated glass according to Claim 1 ~~or 2~~,

wherein the moisture resistance improver has a solubility parameter in the range of 10.0 to 20.0 $(cal/cm^3)^{1/2}$.

4. (currently amended): The interlayer film for a laminated glass according to Claim 1, ~~2 or 3~~,

wherein the moisture resistance improver has a relative permittivity in the range of 20 to 35 at 25°C.

5. (currently amended): The interlayer film for a laminated glass according to Claim 1, ~~2, 3 or 4,~~

wherein the moisture resistance improver is a phosphate ester compound.

6. (currently amended): The interlayer film for a laminated glass according to Claim 1, ~~2, 3, 4 or 5,~~

which contains a chelating agent and/or a compound having at least one carboxyl group.

7. (original): The interlayer film for a laminated glass according to Claim 6,

wherein the chelating agent is acetylacetone.

8. (original): The interlayer film for a laminated glass according to Claim 6,

wherein the compound having at least one carboxyl group is 2-ethyl hexanoic acid.

9. (currently amended): The interlayer film for a laminated glass according to Claim 1, ~~2, 3, 4, 5, 6, 7 or 8,~~

which contains a heat ray shielding particle.

10. (original): The interlayer film for a laminated glass according to Claim 9,

wherein the heat ray shielding particle is at least one kind selected from the group consisting of a tin-doped indium oxide (ITO) fine particle, an antimony-doped tin oxide (ATO) fine particle, an aluminum-doped zinc oxide (AZO) fine particle, an indium-doped zinc oxide (IZO) fine particle, a silicon-doped zinc oxide fine particle, a zinc antimonic anhydride fine particle, and a lanthanum hexaboride fine particle.

11. (original): An interlayer film for a laminated glass,

which contains at least one kind of inorganic fine particle selected from the group consisting of a silica fine particle, an aluminum oxide fine particle, and a zirconium oxide fine particle, the inorganic fine particle having a dispersion diameter of 500 nm or less.

12. (currently amended): A laminated glass,

which is obtainable by using the interlayer film for a laminated glass according to Claim 1, ~~2, 3, 4, 5, 6, 7, 8, 9, 10 or 11~~.

13. (new): The interlayer film for a laminated glass according to Claim 2,

wherein the moisture resistance improver has a solubility parameter in the range of 10.0 to 20.0 $(cal/cm^3)^{1/2}$.

14. (new): The interlayer film for a laminated glass according to Claim 2,

wherein the moisture resistance improver has a relative permittivity in the range of 20 to 35 at 25°C.

15. (new): The interlayer film for a laminated glass according to Claim 3,

wherein the moisture resistance improver has a relative permittivity in the range of 20 to 35 at 25°C.

16. (new): The interlayer film for a laminated glass according to Claim 2,

wherein the moisture resistance improver is a phosphate ester compound.

17. (new): The interlayer film for a laminated glass according to Claim 3,

wherein the moisture resistance improver is a phosphate ester compound.

18. (new): The interlayer film for a laminated glass according to Claim 4,

wherein the moisture resistance improver is a phosphate ester compound.

19. (new): The interlayer film for a laminated glass according to Claim 2,

which contains a chelating agent and/or a compound having at least one carboxyl group.

20. (new): The interlayer film for a laminated glass according to Claim 3,

which contains a chelating agent and/or a compound having at least one carboxyl group.
